Nilsen, Ph.D. Presentation Title: On the Road to Smart Health. Presentation Abstract: Science is changing rapidly and new transdisciplinary approaches are resulting in transformative change across domains. Health and medicine have slowly begun to embrace convergent approaches that involve expertise from non-traditional disciplines, such as computing and engineering, which has resulted ...An agent-based model (ABM) is a class of computational models for simulating the actions and interactions of autonomous agents (both individual or collective entities such as organizations or groups) with a view to assessing their effects on the system as a whole. It combines elements of game theory, complex systems, emergence, computational sociology, multi-agent systems, and evolutionary ...Veselina Jecheva, Burgas Free University, Faculty of Computer Science and Engineering, Faculty Member.
