

Download Chapter 33 Invertebrates Study Guide

Answers

Not all vertebrates have the same number of vertebrae. Remember, a human has 33 vertebrae, but an alligator has about 66 vertebrae, and a snake can have as many as 500 vertebrae! Arthropods are a very diverse group of animals that make up a very large part of Earth's ecosystems. Here we will learn about their characteristics, anatomy & physiology, and classification. - Chapter 33 Invertebrates Study Guide Answers
