

Download General Aviation Firefighting For Structural Firefighters

The Andorran Fire Brigade, with headquarters at Santa Coloma, operates from four modern fire stations, and has a staff of around 120 firefighters. The service is equipped with 24 fire service vehicles - 16 heavy appliances (fire tenders, turntable ladders, and specialist four-wheel drive vehicles), four light support vehicles (cars and vans), and four ambulances. Note: This list does not include firefighting equipment, i.e., tools and apparatus used by firefighters. Please refer to Glossary of firefighting equipment for such terms. Similarly, although there is much overlap, you may also want to refer to the Glossary of wildfire terms for terminology particular to that type of firefighting. Note: Many of the terms defined here, particularly relating to ...CREW LEADER (12 HOURS). The Crew Leader course has been designed to provide a firefighter with the necessary skills and knowledge to direct a crew of firefighters in the performance of a task during a motor vehicle accident, structural fire, flammable liquid or gas incident. This glossary provides the wildland fire community a single source for wildland fire and incident management terminology commonly used by the NWCG and its subgroups. - General Aviation Firefighting For Structural Firefighters
