CHANDLER FIRE DEPARTMENT HAZARDOUS MATERIALS MANAGEMENT PLAN General Instructions A hazardous materials management plan (HMMP) is required when applying for a hazardous materials permit whenever 1.) a facility is designated as a Group H, division 6 semiconductor manufacturer; 2.) a building or site has multiple Group H occupancy designations; 3.) Dangerous goods, abbreviated DG, are items or substances that when transported are a risk to health, safety, property or the environment. Hazardous materials (abbreviated as HAZMAT or hazmat) are substances, solids, liquids, or gases that can harm people, other living organisms, property, or the environment, more specifically.. Hazardous materials are often subject to chemical regulations. On March 6, 1989, OSHA promulgated a final rule on Hazardous Waste Operations and Emergency Response (29 CFR Part 1910). The rule, which will take effect on March 6, 1990, is a direct result of the Superfund Amendments and Reauthorization Act of 1986 (SARA). If one of your critical suppliers suffers a catastrophic hazardous chemical or oil spill and shuts down, do you have an alternate source at the ready? As supply interruptions ripple like a giant chill down your supply spine, will your production slow down, or worse, grind to a complete stop? What kinds of losses are you able to absorb? - Highly Hazardous Materials Spills And Emergency Planning.
