

Download Information Systems: Technology, Economics, Applications, Management

The Master of Science in Information Technology and Management (MS ITM) is a 36 semester credit hour STEM (Science, Technology, Engineering and Mathematics) degree program (18-24 months) that prepares students to better understand the complex world of Information Technology, its management and issues that occur at the interface between IT and business. You're an experienced information technology professional, and you're ready to move to the next level of IT leadership. The Master of Information Systems Management (MISM) degree from the Forbes School of Business & Technology at Ashford University can help you get there. The Management Information Systems minor is useful for students majoring in any discipline that uses technology. In business disciplines (e.g. Accounting, Human Resource Management, Finances, etc.) it provides a foundation of technical concepts and practical concepts that will aid in designing, building and supporting the use of technology to achieve functional goals in an organization. About the Information Systems Management Bachelor's Degree. In the information systems management degree, coursework will teach you how to conceptualize, implement, and manage high-quality, secure information systems. - Information Systems: Technology, Economics, Applications, Management
