Zolix is a professional manufacturer of Spectragraph?Spectroscopy?Fluorescence Spectrophotometer?Raman Spectrometer?Spectrometer?Solar Cell System?Solar Simulator?Quantum Efficiency System?I-V Testing System?Solar Cell-IV?Grating Spectroscopy?HyperspectraOptical Path Difference (OPD) is the difference between the two beams travelling through the two arms of an interferometer. OPD is equal to the product of the physical distance travelled by the moving mirror (multiplied by 2, 4, or other multiplier, which is a function of the number of reflecting elements used) and  $n$ , the index of refraction of the medium filling the interferometer arms (air ...A near infrared spectrometer (also known as NIR spectrometer) is an analytical instrument used to examine pharmaceutical, chemical or medical materials in bulk, with very little sample preparation.OceanView provides numerous automated Wizards ready to walk you through complex spectroscopy and color processing tasks. Just select the task you wish to perform (absorbance, Raman, colormetrics etc), and intuitive forms will walk you through each step in data collection and process configuration. - Manual Of Spectroscopy
