

# Download Mummies, Bones And Body Parts

The methods of embalming, or treating the dead body, that the ancient Egyptians used is called mummification. Using special processes, the Egyptians removed all moisture from the body, leaving only a dried form that would not easily decay. It was important in their religion to preserve the dead body ...The Mummies of Guanajuato are a number of naturally mummified bodies interred during a cholera outbreak around Guanajuato, Mexico in 1833. [not verified in body]The human bodies appear to have been disinterred between 1870 and 1958. During that time, a local tax was in place requiring a fee to be paid for "perpetual" burial.A bog body is a human cadaver that has been naturally mummified in a peat bog.Such bodies, sometimes known as bog people, are both geographically and chronologically widespread, having been dated to between 8000 BCE and the Second World War. The unifying factor of the bog bodies is that they have been found in peat and are partially preserved; however, the actual levels of preservation vary ...The Gruesome History of Eating Corpses as Medicine The question was not "Should you eat human flesh?" says one historian, but, "What sort of flesh should you eat?" - Mummies, Bones And Body Parts
