

# Download Soh Cah Toa Practice Questions

SOH-CAH-TOA is an acronym for the ratios of the sides of a right triangle that are used to determine the sine, cosine, and tangent functions of an angle. This carefully selected compilation of exam questions has fully-worked solutions designed for students to go through at home, saving valuable time in class. Click [?Test](#) and improve your knowledge of Holt Geometry Chapter 10: Trigonometry with fun multiple choice exams you can take online with Study.com. Image Source: Photo by Jeff Wilson – [www.warbirddepot.com](http://www.warbirddepot.com). Trigonometry is used a lot in the work done by Pilots and Air Traffic Controllers. However, a lot of the maths formulas are programmed into computer applications, and we do not see people sitting around pushing the sin, cos and tan buttons on calculators! - Soh Cah Toa Practice Questions
