

Download Solving One Step Equations Activity

A one-step equation is as straightforward as it sounds. You will only need to perform one step in order to solve the equation. One goal in solving an equation is to have only variables on one side of the equal sign and numbers on the other side of the equal sign. The other goal is to have the number in front of the variable equal to one. The strategy for getting the variable by itself with a ...Equations like $5n/4 = 10$, can also be solved using two opposite steps such as $\times 4$ then divide by 5. We will be looking at two step equations in a separate article on this blog. A selection of resources looking at solving one step equations. For more resources like this, look at www.teachingmaths.net Let's ease into this, shall we? Here's an introduction to basic algebraic equations of the form $ax=b$. Remember that you can check to see if you have the right answer by substituting it for the variable! - Solving One Step Equations Activity
