

Download Suicidal Behavior Theories And Research Findings

The origins of recent theories can be traced back to Freud, although sustained research into suicide did not begin in earnest until the 1950s, and has grown substantially in the past 25 years.^{7, 8} Contemporary models of suicide are mostly diathesis stress in origin and cognitive in focus (^{9, 11, 12, 14, 15, 19}). Diathesis–stress models posit that the negative results of pre-existing ... This review provides a conceptual and empirical update regarding ideation-to-action theories of suicide. These theories — including the interpersonal theory (IPTS), integrated motivational–volitional model (IMV), three-step theory (3ST), and fluid vulnerability theory (FVT) — agree that, firstly, the development of suicidal ideation and secondly, the progression from suicide desire to ... Research Studies Indirect suicidal behavior has been studied in several populations. For example, researchers Carol Garrison and colleagues conducted a survey of a community sample of 3,283 American youths in the range of twelve to fourteen years of age. Findings from AFSP's grants have been published in numerous scholarly journals. [Click here to view all recent publications.](#) - Suicidal Behavior Theories And Research Findings
