The imprinted brain theory is a somewhat similar although not identical theory. It argues that autism and psychosis are contrasting disorders on a number of variables. This is argued to be due to imbalanced genomic imprinting. According to the imprinted brain theory there could be a mismatch and more severe problems when extreme genomic imprinting occurs in the opposite sex, which would explain ...Empathy is the capacity to understand or feel what another person is experiencing from within their frame of reference, that is, the capacity to place oneself in another's position. There are many definitions for empathy that encompass a broad range of emotional states. Types of empathy include cognitive empathy, emotional empathy, and somatic empathy. For many people, there is no difference between smart and intelligent, because the words seem to be interchangeable. However, there is a difference between the meanings and use of these words. Smart can be applied to learned inferences, such as making smart business or emotional decisions. Smart is ...Get the latest health news, diet & fitness information, medical research, health care trends and health issues that affect you and your family on [ABCNews.com](http://ABCNews.com) - The Essential Difference Male And Female Brains And The Truth About Autism
