The degree of education is the most notable difference between the two groups. Sixty-five per cent of new young farmer innovators have attended a degree course at university, compared to 45% of non-innovators (see Table 2). Another difference is the degree of diversification of the farms: innovators' farms are more diversified than those of non-innovators, with a strong presence of ... - The New Peasantries Struggles For Autonomy And Sustainability In An Era Of Empire And Globalization
