Birds, also known as Aves, are a group of endothermic vertebrates, characterised by feathers, toothless beaked jaws, the laying of hard-shelled eggs, a high metabolic rate, a four-chambered heart, and a strong yet lightweight skeleton. Birds live worldwide and range in size from the 5 cm (2 in) bee hummingbird to the 2.75 m (9 ft) ostrich. They rank as the world's most numerically-successful ... Keeping chickens as pets became increasingly popular in the 2000s among urban and suburban residents. Most people had originally gotten chickens for their egg production but soon began to name them and treating them as any other pet. Chickens are just like any other pet in that they provide companionship and have individual personalities.
